

For SMEs

Comprehensive Incident Response for Your Organization Against Cyber, Reputational & Physical Threats

Concierge Cyber[®] is an annual subscription that guarantees incident response to a cyberattack, data breach or business email compromise through a global team of third-party experts to help you in the event of an attack.

Entity Security in the Digital Age

The world of corporate security is inextricably linked to the digital realm and cyber threats. What type of industry you operate, your office locations, and details about your products and services are often shared on social media.

Your non-public corporate information, including intellectual property and trade secrets, are regularly collected and sold on the dark web. Malicious actors use this information to target entities like you.

Are you prepared to navigate this treacherous terrain?

Protecting your organization and what's most important to you and your stakeholders is increasingly difficult.

Consider the following critical questions:

Who do you call after hours, weekend, or holidays when my organization suffers a cyberattack, data breach or business email compromise?

How do you avoid paying significantly higher legal and other vendor incident response rates?

How do you move forward with an incident response plan that's not covered by cyber insurance?

If these questions leave you uncertain, your entity's security posture may be vulnerable. Failure to address these challenges can have devastating consequences.

Don't Leave Your Entity's Security to Chance

Our Services

Concierge Cyber[®] members now have access to a plan that spans the physical and digital worlds. We can provide the information you need to know where you're vulnerable, to reduce your cyber risk, and help take steps to keep you safe. This solution includes:
